Accessibility Profiles

Blind

Blind Profile allows your website visitors to access the website using screen reader and keyboard navigation.

🗣 Talk & type	🖥 Screen Reader

Motor Impaired

Users with Motor Impairment have difficulties to access websites with mouse and keyboard. This profile provides options that can make site navigation much less complicated.

🔍 Text Magnifier	📷 Stop Animations

Visually Impaired

Someone who has partial vision loss or has difficulties in reading, this profile provides suggestions that can be helpful for a variety of conditions.

🔍 Text Magnifier	👆 Big White Cursor	📷 Stop Animations
🔆 High Saturation	T Readable Font	◑ Smart Contrast

Dyslexia

Dyslexia is a learning disorder that involves difficulty reading due to problems identifying speed sounds and learning how they relate to letters and words.

📷 Stop Animations	Df Dyslexia Font

Cognitive & Learning

Cognitive impairments and learning disabilities can have a profound effect on reading comprehension.

📷 Stop Animations	◐ Reading Mask	🔍 Text Magnifier
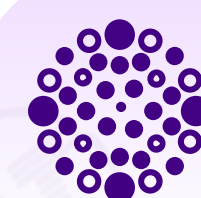

Color Blind

Individuals with color blindness see colors differently than normal people. The available group of features provides relevant suggestions.

⬤ Deuteranomaly

Accessibility Profiles

ADHD

By selecting this profile, it help visitors to stay focused as they move through a webpage. The recommendations included in this profile may help alleviate distractions to improve reading comprehension.

| Stop Animations | Reading Mask | Low Saturation |

Seizure & Epileptic

Flashing page elements, animations and videos can sometimes trigger seizures in people with epilepsy and similar conditions.

| Stop Animations | Low Saturation |

Elderly

The Elderly profile is designed to enhance accessibility for older adults. It activates features such as the Big White Cursor, Text Magnifier, Stop Animation, Highlight Focus, Reading Guide, Content Scaling, and Smart Contrast to improve readability and ease of use.

Content Scalling	Text Magnifier	Big White Cursor
Stop Animations	Reading Guide	Hightlight Focus
Smart Contrast		

SKYNET TECHNOLOGIES

Color Blindness, Voice Commands
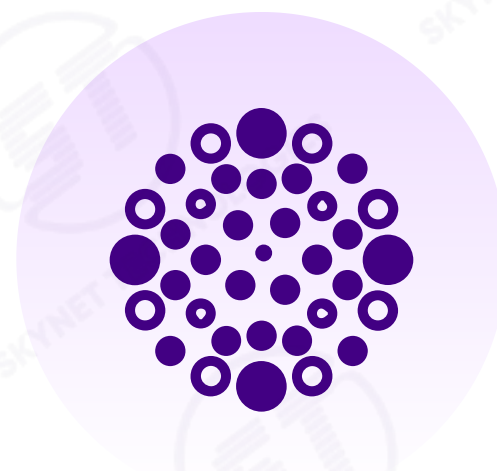

Color Blindness Setting

Color Blindness feature helps users to change website colors according to the color vision deficiency they have. The following 8 types of color blindness settings are available:

1. Protanomaly,
2. Deuteranomaly
3. Tritanomaly
4. Protanopia
5. Deuteranopia
6. Tritanopia
7. Achromatomaly
8. Achromatopsia

Voice Navigation

Navigate the website effortlessly with Voice Navigation, enhancing user experience through voice-activated, accessible, and customizable browsing.

Supported Languages | Supported Commands

Libras and Talk & Type

Signmadeeasy - American Sign Language

Feature is used as American Sign Language. The beta version will be launched in the 3rd quarter of 2025.

Libras (Brazilian Portuguese only)

Libras (Brazilian Portuguese only) feature is used as a sign language for hand and arm movements, facial expressions, and body positions to convey meaning. Sign language is a native language for many people who are deaf, and some who don't understand written language well.

Talk & Type

Talk & Type accessibility feature that empowers users to fill forms effortlessly using their voice. Say farewell to typing struggles and hello to seamless form completion with intuitive speech recognition technology. With Talk & Type, accessibility is at the forefront, ensuring everyone can navigate forms with ease, regardless of disability or typing limitations. Embrace a more inclusive digital experience today.

Supported Languages

Analytics Tracking

Google Analytics Tracking

Enter GA4 measurement ID to track information about its usage on the website, number of profile clicks, and more.

Adobe Analytics Tracking

Enter Adobe Tracking ID to see information about its usage on the website, number of profile clicks, and more.

Screen Reader

Read Page
Allows a voice to read the text on your site out loud to visitors.

[Supported Languages](#) | [Keyboard Shortcuts](#)

Read Mode
Puts a webpage in a text only, reading-focused mode.

Reading Mask
The reading mask improves concentration on specific content. By putting up reading mask, it will highlight the page elements which are underneath the cursor.

Reading Guide
By enabling reading guide feature, it will convert the cursor into a sharp contrast horizontal reading guideline which helps to reduce eye strain for users who are cognitive, visual, dyslexic, and Presbyopia disabilities.

Skip Links
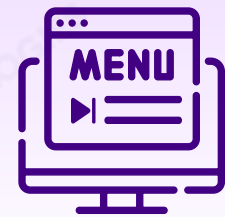

Skip to Menu

It will allow quick access to the footer on the page.
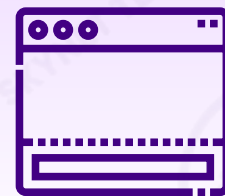

Skip to Footer

It will allow quick access to the footer on the page.

Skip to Content

Puts a webpage in a text only, reading-focused mode.

Open Accessibility Toolbar

Open Accessibility Toolbar to enable accessibility features based on your requirements.

Content Adjustments
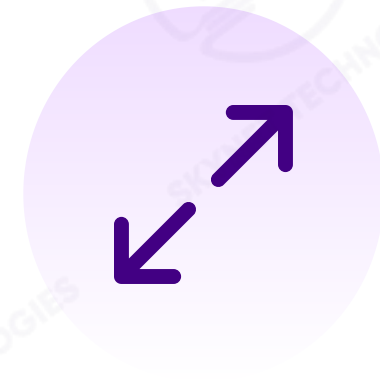

Content Scaling
It allows users to scale visual content including images, text, graphs, illustrations, etc. to zoom in and zoom out.

Readable Fonts
By clicking on this, it will replace any fancy fonts with simple readable fonts.

Highlight Links
It focuses on links, buttons, and other action elements in high contrast colors which are easy to recognize. Also, highlight clickable components for better and easier website usability and accessibility.

Dyslexia Fonts
Dyslexia Friendly Font enhances readability for those with dyslexia and provides an easier and more fluid reading D experience that is tailored to site visitors with dyslexia.

Highlight Title
It will highlight the titles and help users and assistive technology to understand the structure of the page and its components.

Text Magnifier
Text Magnifier works as a virtual magnifying glass which allows to enlarge the selected text area.
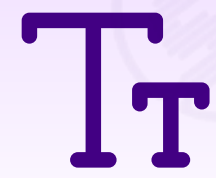

Adjust Font Sizing

Font size can be adjustable according to users requirements.

Adjust Letter Spacing

Text and line spacing can be modified, thus, dyslexic, and visually impaired users get benefit. All in One Accessibility® offers a significant level of adjustment for a readable and personalized experience.
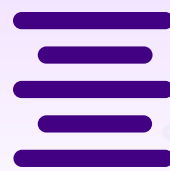

Align Center

For more personalized and accessible experience, it will allow to change the alignment of the text at center.

Line Height

Get more comfortable spacing for all on-site text with the Adjust Line Height option.

Align Left

For more personalized and accessible experience, it will allow to change the alignment of the text at left.

Align Right

For more personalized and accessible experience, it will allow to change the alignment of the text at right.

Color and Contrast Adjustments
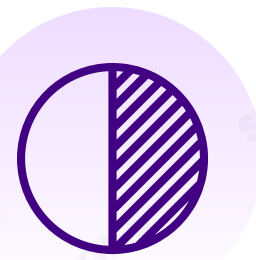

High Contrast

Increase the contrast of all website elements with a High Contrast color theme. It will sharply contrast all elements, texts, buttons, and form fields with one click.

Smart Contrast

With the "Smart Contrast" feature, your website's colors will meet ADA compliance standards, significantly enhancing the visibility of your content.

Dark Contrast

Increase the contrast of all website elements with a Dark Contrast color theme. It will dark contrast all elements, texts, buttons, and form fields with one click.
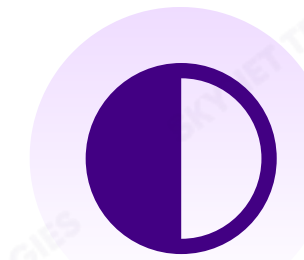

Monochrome

Transform the website to a monochrome color scheme (black, white and grey); so, the people with color blindness can easily access the website content.
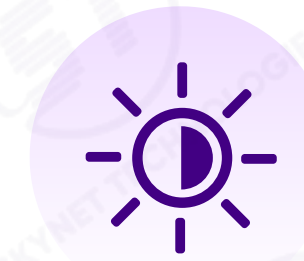

Light Contrast

Set up light contrast of all website elements with a Light contrast color theme. It will low contrast all elements, texts, buttons, and form fields with one click.
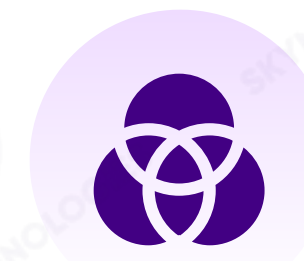

High Saturation

Select these High Saturation option to set the intensity of website colors to high.

Low Saturation

Select these Low Saturation options to set the intensity of website colors to low.

Adjust Title Color

Title Colorization allows to change the title color of all the elements from provided colors.

Invert Colors

Complete color inversion for all site components, provide enormous color depth, which makes texts easier to read for color blind and visually impaired people by reducing the eye strain.

Adjust Background Color

Background Colorization allows to change the background color of all the elements from the provided colors.

Adjust Text Color

Text Colorization allows to change the text color of all the elements from the provided colors.

Orientation Adjustments

Hide Images

By enabling this feature, it will hide all images of site and displays the text only.

Mute Sounds

It allows you to mute the sounds from the website.

Highlight Focus

It will highlight focused elements when any user tries to navigate any pages using keyboard.

Highlight Hover

It allows to keep users' attention by highlighting the area where user is hovering.

Big Black Cursor

It enhances the cursor size significantly to make sure that the pointer always stays in sight. Moreover, the bigger cursor allows the faster and more accessible navigation through tabs, form elements, and hyperlinks.

Big White Cursor

It enhances the cursor size significantly to make sure that the pointer always stays in sight. Moreover, the bigger cursor allows the faster and more accessible navigation through tabs, form elements, and hyperlinks.

Stop Animation

It helps in pausing the content that moves or auto-updates. Moreover, stops content blinking, flashing, and animations that can trigger seizures.

Filter Content

Quickly reveal page headings, landmarks and links in a clear, structured, easily navigable and accessible manner. It helps users to find the content they want faster.

Others/Misc

Accessibility Statement

Accessibility statement helps your users to understand the current status of your website's accessibility as well as any accessibility related efforts your business is doing currently.

Hide Interface

Hide the accessibility interface, user won't be able to see it anymore, unless they clear their browsing history and data.

Image Alternate Text

It provides a list of recommended alt text based on AI, remediated image alt text list, decorative images from where you add missing alternate text and update them as per requirement.

Multi Language

Select your preferred language from 140+ available languages or keep the default <<auto detect>> for your accessibility widget.
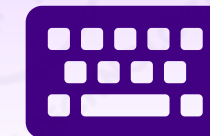

Virtual Keyboard

All in One Accessibility® provides an on-screen virtual keyboard to eliminate the need for physical keys. A virtual keyboard ensures an alternative input mechanism for users with disabilities.

Supported Languages

Dictionary

All in One Accessibility® allows users to access dictionary lookups for idioms, acronyms and complex words without leaving the website. In addition to being a WCAG requirement, it ensures you content is more accessible to readers of all levels.

Dashboard

Set Default Language

This feature allows users to define a primary language for the All in One Accessibility widget and accessibility preferences such as screen reader, enhancing the user experience for non-native speakers or specific audiences. It simplifies navigation and interaction, especially for multilingual websites.

Auto-Detect Language

It automatically identifies the browser language and adjusts the All in One Accessibility widget language accordingly, delivering a seamless experience for users in their native language without requiring manual adjustments.

Select Screen Reader Voice

This feature enables users to customize the voice used by screen readers. This includes choosing from a variety of tones, accents, and speech styles to match personal preferences or accessibility needs. It enhances the user experience by providing a more comfortable and engaging auditory interface.

Automated Accessibility Compliance Report

Automated Accessibility Scan report includes accessibility score, list of remediated violations, and list of violations that require manual actions.

Accessibility Score

Accessibility Score is based on an automated accessibility scan algorithm that compares your site's accessibility against a comprehensive WCAG rule set.

Manual Image Alt Text Remediation by Website Owner

AI will automatically remediate missing image alt text. Alternatively, website owners can manually add alternative text descriptions to images using All in One Accessibility Dashboard. This feature ensures that visually impaired users can access meaningful descriptions of images, enhancing their overall browsing experience and complying with accessibility standards.

Optional Paid Add-Ons

SKYNET TECHNOLOGIES

1

Manual Accessibility Audit

From $1000

An accessibility audit is a thorough evaluation of a website's compliance with accessibility standards. It assesses how well a website meets the needs of people with disabilities and complies with the Americans with Disabilities Act (ADA) and Web Content Accessibility Guidelines (WCAG).

For more information, Click here

2

Manual Accessibility Remediation

From $1000

Our experts review all templates, PDFs, pages, and videos based on WCAG 2.0, 2.1, and 2.2 standards. Kickstart your accessibility journey with manual audit, and get a compliance roadmap!

For more information, Click here

3

PDF/Document Remediation

From $1000/5 Pages

The PDF / Document Remediation provides a list of inaccessible PDFs and remediated PDFs from where you can request PDF remediation service.

For more information, Click here

Optional Paid Add-Ons
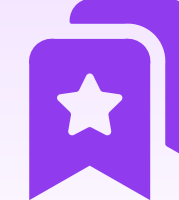

SKYNET TECHNOLOGIES

4

VPAT Report/Accessibility Conformance Report(ACR)

Start from $1000

The Voluntary Product Accessibility Template (VPAT), also known as an ACR (Accessibility Conformance Report) starts with an audit and provides current details for an accessible website, application, or any other digital assets.

For more information, [Click here](#)

5

White Label and Custom Branding

$100/Month

Remove the Skynet Technologies logo as well as all of the footer links, popups, report a problem link and more for full white label control.

For more information, [Click here](#)

6

Live Website Translations

Start form $25/Month for 100 pages

Instantly translate your site into 140+ languages to make it more accessible for non-native speakers, people with language acquisition difficulties, and people with learning disabilities.
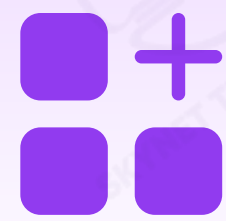

For more information, [Click here](#)

Optional Paid Add-Ons

SKYNET TECHNOLOGIES

7

Modify Accessibility Menu

$250/Year

Build and fine-tune your widget with the Modify Menu option. Reorder, remove and restructure the widget buttons to fit your users' specific accessibility needs.
