**CASE STUDY**

# **The secure and seamless Drupal 7 to Drupal 9 website migration for Nevada based cancer coalition non-profit organization!**

# Project Details

## Industry

Health Care, Non-profit

## Project Size

Medium

## Platform

Drupal

## Services

Drupal 7 to 9 Migration, Website ADA automated and manual audit

# The Brief

The cancer coalition non-profit organization unites and leads community partners to work for reducing the burden of cancer in Nevada by fostering statewide collaboration, empowering people with information and resources. They envision healthy communities across Nevada with equitable access to quality cancer care and support for every human being.

# The Challenges

- The website was built on Drupal 7, and they wanted to upgrade to Drupal 9 for more security, and extensibility.
- As a non-profit organization, they wanted to make their website fully ADA compliant.
- Additionally, they have 2 other programs and wanted to merge their websites into a single brand.

# The Solution

- The website data migration from Drupal 7 to 9 had been done smoothly.
- We performed a website ADA automated and manual audit; and remediated website design as per WCAG 2.1 AA.
- For combining their 3 programs' websites; we have customized categories and sub menu implementation based on brand. With the help of Drupal's taxonomy and template customization, it was easily handled.
- With the help of Full Calendar View, Calendar, and Calendar DateTime modules, we have implemented Calendar view in a month and list format.
- We have detected Russian bot during form submission; To protect website from spam bots; we have integrated "CleanTalk" module.
- At the backend system, we have helped to organize website assets in a better way. We have categorized them by Year in the media library.

# Result

- Drupal has excellent accessibility, flexibility, and taxonomy customization features to manage the above solutions seamlessly.
