SKYNET TECHNOLOGIES
Color Blindness

Color Blindness Setting

Color Blindness feature helps users to change website colors according to the color vision deficiency they have. The following 8 types of color blindness settings are available:

1. Protanomaly,
2. Deuteranomaly
3. Tritanomaly
4. Protanopia

5. Deuteranopia
6. Tritanopia
7. Achromatomaly
8. Achromatopsia

Screen Reader

Read Page

Allows a voice to read the text on your site out loud to visitors.

Read Mode

Puts a webpage in a text only, reading-focused mode.

Reading Mask

The reading mask improves concentration on specific content. By putting up reading mask, it will highlight the page elements which are underneath the cursor.

Reading Guide

By enabling reading guide feature, it will convert the cursor into a sharp contrast horizontal reading guideline which helps to reduce eye strain for users who are cognitive, visual, dyslexic, and Presbyopia disabilities.
Skip Links

Skip to Menu

It will allow quick access to the footer on the page.

Skip to Content

Puts a webpage in a text only, reading-focused mode.

Skip to Footer

It will allow quick access to the footer on the page.

Content & Orientation Adjustments
Content Scaling

It allows users to scale visual content including images, text, graphs, illustrations, etc. to zoom in and zoom out.

Readable Fonts

By clicking on this, it will replace any fancy fonts with simple readable fonts.

Text Highlighter (Yellow, Blue, Green, Pink)

Empower your browsing accessibility with our ReadWriteMadeSimple browser extension's Text Highlighter feature. Enhance readability by allowing users to select and colorize text, aiding visual distinction for those with diverse needs. Elevate productivity and inclusivity with this intuitive tool.

Dyslexia Fonts

Dyslexia Friendly Font enhances readability for those with dyslexia and provides an easier and more fluid reading D experience that is tailored to site visitors with dyslexia.
Highlight Links

It focuses on links, buttons, and other action elements in high contrast colors which are easy to recognize. Also, highlight clickable components for better and easier website usability and accessibility.

Text Magnifier

Text Magnifier works as a virtual magnifying glass which allows to enlarge the selected text area.

Adjust Font Sizing

Font size can be adjustable according to users requirements.

Adjust Line Height

Get more comfortable spacing for all on-site text with the Adjust Line Height option.

Adjust Letter Spacing

Text and line spacing can be modified, thus, dyslexic, and visually impaired users get benefit. All in One Accessibility™ offers a significant level of adjustment for a readable and personalized experience.

Align Right

For more personalized and accessible experience, it will allow to change the alignment of the text at right.

Align Left

For more personalized and accessible experience, it will allow to change the alignment of the text at left.

Align Center

For more personalized and accessible experience, it will allow to change the alignment of the text at center.

Hide Images

By enabling this feature, it will hide all images of site and displays the text only.
Color and Contrast Adjustments

High Contrast

Increase the contrast of all website elements with a High Contrast color theme. It will sharply contrast all elements, texts, buttons, and form fields with one click.

Monochrome

Transform the website to a monochrome color scheme (black, white and grey); so, the people with color blindness can easily access the website content.
Smart Contrast

With the "Smart Contrast" feature, your website's colors will meet ADA compliance standards, significantly enhancing the visibility of your content.
Light Contrast

Set up light contrast of all website elements with a Light contrast color theme. It will low contrast all elements, texts, buttons, and form fields with one click.
Dark Contrast

Increase the contrast of all website elements with a Dark Contrast color theme. It will dark contrast all elements, texts, buttons, and form fields with one click.

High Saturation

Select these High Saturation option to set the intensity of website colors to high.

Low Saturation

Select these Low Saturation options to set the intensity of website colors to low.
Invert Colors

Complete color inversion for all site components, provide enormous color depth, which makes texts easier to read for color blind and visually impaired people by reducing the eye strain.

Others/Misc

Move to Top, Move to Bottom

Change the position of the toolbar at bottom or top of the screen.

Web Search

Select any keyword and search its meaning on the google.

Color Theme

Update color theme from light, dark, high contrast, ultra violet and sepia based on your preference.

Multi Language

Select your preferred language from 140+ available languages or keep the default <<auto detect>> for your accessibility widget.

Dictionary

All in One Accessibility™ allows users to access dictionary lookups for idioms, acronyms and complex words without leaving the website. In addition to being a WCAG requirement, it ensures you content is more accessible to readers of all levels.
Virtual Keyboard

All in One Accessibility™ provides an on-screen virtual keyboard to eliminate the need for physical keys. A virtual keyboard ensures an alternative input mechanism for users with disabilities.

Reset

Reset extension into default extension mode.
